

Kyle Close

Software Engineer · C#, .NET, TypeScript, React

k.james.close@gmail.com
kyleclose.dev · github.com/Kyle-Close
linkedin.com/in/kyle-close

Software engineer building backend services and integrations in **C# and .NET** and full-stack apps with **React and TypeScript**, backed by thorough testing (**380+ automated tests** across recent projects) and CI/CD.

SKILLS

Languages	C#, TypeScript, JavaScript, Python, SQL, C, HTML, CSS
Backend	.NET / ASP.NET Core, Node.js, FastAPI, REST APIs, JWT authentication
Frontend	React, Redux, Tailwind CSS, Material UI
Databases	SQL Server, PostgreSQL, SQLite, MongoDB
Tools	Git, Docker, GitHub Actions, CI/CD, xUnit, pytest, Vitest, Linux, Figma, Agile

EXPERIENCE

Conexiom | Software Engineer

Vancouver, BC · May 2022 – Aug 2025

- Built **30+ custom C# / .NET integrations** connecting customer systems to more than six ERP platforms (SAP, Oracle, NetSuite, CloudSuite, Epicor, Sage) via REST APIs, most delivered in **~3 days** vs. the typical 1–2 weeks.
- Packaged recurring integration logic into reusable tooling adopted across **100+ customer accounts**, cutting new integration setup time by **~50%**.
- Developed and maintained backend services and automated data processing pipelines backed by **SQL Server**.
- Proposed and shipped features for an internal web application used by **50+ developers and support staff** to manage customer request queues and developer workflows.
- Wrote hundreds of unit and integration tests in a **CI/CD pipeline** and QA'd internal tool changes before release.
- Trained **5 developers** on internal processes, tooling, and productivity techniques to streamline team onboarding.

Toyota | Summer Student

Cambridge, ON · May 2021 – Sep 2021

- Installed airbags on a high-speed RAV4 production line under strict safety and quality standards.

PROJECTS

Chess

kyle-close.github.io/chess

C# · ASP.NET Core · MongoDB · React · TypeScript · Docker

- Built a **.NET 8 REST API** that enforces the complete rules of chess, including castling, en passant, promotion, checkmate, stalemate, the fifty-move rule and insufficient material, with game state persisted in **MongoDB**.
- Integrated the **Stockfish** engine as a single long-running process shared across requests, with 21 difficulty levels, play from any position (FEN), and chess clocks in the React front end.
- Covered game logic with **173 xUnit tests**; containerized with Docker and deployed to Fly.io via GitHub Actions.

Progression – workout tracker

kyle-close.github.io/workout-client

Python · FastAPI · SQLite · React · TypeScript · Docker

- Designed a **FastAPI** REST API with repository / service layers and **JWT auth** with bcrypt password hashing.
- Automates strength programming: working weights and plate breakdowns from one-rep-max percentages, maxes that update from logged performance, and auto-generated training weeks.
- Backed by **120 pytest tests**; deployed to Fly.io with Docker and GitHub Actions, with a pre-seeded demo account.

Blackjack Simulator

github.com/Kyle-Close/blackjack

TypeScript · Node.js · Vitest

- Simulation engine that plays tens of thousands of hands from a multi-deck shoe to measure how playing strategies affect the house edge, logging each run to CSV for analysis; covered by **87 Vitest tests**.

EDUCATION

Conestoga College | Diploma, Computer Engineering

Kitchener, ON · Sep 2019 – May 2022

GPA 3.7 / 4.0. Coursework: Data Structures & Algorithms, Operating Systems, Networking, Databases, OOP, CS50.

Capstone: maze-solving robot car using a custom shortest-path algorithm written in C.
